

## WHAT YOU DO

### Upload your Inventory ... and RELAX!

For quoting purposes, access our easy-to-use online upload to send us an inventory list of your surplus or obsolete equipment.

## WHAT WE DO

### REVIEW ASSETS

We assess everything in your inventory and submit an offer to you. One of our I.T. asset resale specialists can create a customized solution for you.

### COLLECTION

We'll pick up your inventory, or you can drop it off, when it's convenient for you.

### DESTROY DATA & TEST

We use data overwriting or wiping so the drives of your devices can be used again. We then test the equipment and create our sales inventory.

### SALES

For any equipment that you choose not to redeploy within your business or donate to charities, we remarket and sell to external buyers.  
*(Not including hard drives that are destroyed per NIST/NAID standards.)*

### REPORTING

For each of our I.T. asset remarketing services, we provide detailed reports: purchased equipment, purchase price, inventory on hand, and more; we track information at all times to help you make good I.T. asset reselling decisions moving forward.

## WHAT YOU DO

**GET PAID. SLEEP WELL.**
