

QEHS Policy

“Safety, satisfaction and prevention of pollution for this we are all accountable.”

In our journey to become the preferred choice and fulfill our policy, we are committed to:

- Adhere to customer, legal, regulatory, and other requirements related to products/services, processes, environment, occupational health, safety, and security. Continuously enhance the effectiveness of the integrated management system by factoring in community needs, standards, and technological advancements.
- Prevent or reduce pollution and waste while conserving natural resources responsibly and efficiently in all operations.
- Provide and maintain environmentally friendly, safe, and healthy work facilities through operational procedures, secure systems, and effective work methods.
- Prevent unintended incidents and accidents at all company locations and job site facilities.
- We monitor our performance using metrics to continually improve our processes, products, and services.
- Cultivate and support a motivated workforce skilled in managing health, safety, environmental issues, emergencies, and data security.
- We are fostering an understanding of our customers’ (both internal and external) needs and expectations, cultivating a culture that ensures every customer feels that Sadoff is their top choice.
- We consistently apply our integrated management system across all company processes without exception.
- Manage used end-of-life electronics equipment, components, and materials based on a hierarchy of reuse, recovery, and, only when absolutely necessary, disposal.
- Manage R2 focus materials that pass through our facility or are under our control, including the entire recycling chain from end of life domestically or overseas.
- Promote the elimination of e-waste in landfills.
